AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

- 1. (Currently Amended) A flooring plank, comprising:
- a laminate impregnated with a thermosetting resin, the laminate including:
- a perimeter;
- a first upper surface defining a first portion of the perimeter;
- a second upper surface adjacent the first upper surface and defining a second portion of the perimeter, wherein the second upper surface is substantially non-coplanar with the first upper surface; and
- a first groove dividing the second upper surface into at least two sub-surfaces, wherein the width of the first groove is less than about 1 mm.
- 2. (Original) The plank according to claim 1, wherein at least a portion of the first portion of the perimeter is elevationally below at least a portion of the second portion of the perimeter.
- 3. (Original) The plank according to claim 1, wherein the first upper surface is substantially parallel to the second upper surface.
- 4. (Original) The plank according to claim 1, wherein the first upper surface is oblique to the second upper surface.
- 5. (Original) The plank according to claim 1, wherein the at least two sub-surfaces visually depict separate motifs.
- 6. (Original) The plank according to claim 1, wherein at least one of the at least two sub-surfaces is adjacent only the first upper surface and the first groove.

Application No. 10/678,219 Amendment dated September 29, 2005 Reply to Office Action dated March 29, 2005

- 7. (Original) The plank according to claim 1, wherein the first groove is substantially V-shaped.
- 8. (Original) The plank according to claim 1, wherein the first groove comprises sidewalls substantially perpendicular to the second major surface.
- 9. (Original) The plank according to claim 1, wherein a lowermost surface portion of the first surface is substantially coplanar with a lowermost surface portion of the first groove.
- 10. (Original) The plank according to claim 1, wherein the first upper surface and the first groove visually depict substantially the same motif.
- 11. (Original) The plank according to claim 1, further comprising at least one locking mechanism arranged elevationally below the first upper surface.
- 12. (Original) The plank according to claim 11, wherein a portion of the at least one locking mechanism is hidden by the first upper surface.
- 13. (Original) The plank according to claim 11, wherein a portion of the at least one locking mechanism is hidden by the second upper surface.
- 14. (Original) The plank according to claim 1, wherein the second upper surface comprises a surface texture.
- 15. (Original) The plank according to claim 14, wherein the surface texture comprises at least one embossed depression having a depth less than about 0.2 mm.
- 16. (Currently Amended) The flooring system plank according to claim 14, wherein the surface texture is an embossed surface texture.

- 17. (Currently Amended) The flooring system plank according to claim 14, wherein the surface texture is aligned with a decorative motif.
- 18. (Currently Amended) The flooring system plank according to claim 14, wherein the surface texture is unaligned with a decorative motif.
- 19. (Original) The plank according to claim 1, wherein the first upper surface is about 0.794 mm below the second upper surface.
- 20. (Original) The plank according to claim 1, wherein the first upper surface has a width about half the width of the first groove
- 21. (Currently Amended) The plank according to claim 1, wherein the width of the first groove is between about 0.3 about and 0.9 mm-(support in spec?).
 - 22. (Currently Amended) A flooring system, comprising: at least two planks, wherein each plank comprises a <u>laminate including</u>: a perimeter;
 - a first upper surface defining a first portion of the perimeter;
- a second upper surface adjacent the first upper surface and defining a second portion of the perimeter, wherein the second upper surface is substantially non-coplanar with the first upper surface; and
- a first groove dividing the second upper surface into at least two sub-surfaces, wherein first upper surfaces of adjacent ones of the at least two planks form a second groove having a topography substantially identical to a topography of the first groove, and wherein said first groove has a width less than about 1 mm.
- 23. (Original) The flooring system according to claim [[23]]22, wherein the first upper surface is substantially parallel to the second upper surface.

- 24. (Original) The flooring system according to claim [[23]]22, wherein the first upper surface is oblique to the second upper surface.
- 25. (Original) The flooring system according to claim [[23]]22, wherein the at least two sub-surfaces visually depict separate motifs.
- 26. (Original) The flooring system according to claim [[23]]22, wherein at least one of the at least two sub-surfaces is adjacent only the first upper surface and the first groove.
- 27. (Original) The flooring system according to claim [[23]]22, wherein the first groove is substantially V-shaped.
- 28. (Original) The flooring system according to claim [[23]]22, wherein the first groove comprises sidewalls substantially perpendicular to the second major surface.
- 29. (Original) The flooring system according to claim [[23]]22, wherein second portions of perimeters of adjacent ones of the at least two planks are substantially aligned with each other.
- 30. (Original) The flooring system according to claim [[23]]22, wherein a substantially continuous motif is visually depicted across sub-surfaces of adjacent ones of the at least two planks, wherein the sub-surfaces comprise at least a portion of the second portion of the perimeter.
- 31. (Original) The flooring system according to claim [[23]]22, wherein a substantially continuous surface texture is provided across sub-surfaces of adjacent ones of the at least two planks, wherein the sub-surfaces comprise at least a portion of the second portion of the perimeter.
- 32. (Original) The flooring system according to claim [[32]]22, wherein the surface texture is an embossed surface texture.

- 33. (Original) The flooring system according to claim [[33]]32, wherein the embossed surface texture comprises at least one depression having a depth less than about 0.2 mm.
- 34. (Original) The flooring system according to claim 32, wherein the surface texture is aligned with a decorative motif.
- 35. (Original) The flooring system according to claim 32, wherein the surface texture is unaligned with a decorative motif.
- 36. (Original) The flooring system according to claim [[23]]22, wherein the first upper surface and the first groove visually depict substantially the same motif.
- 37. (Original) The flooring system according to claim [[23]]22, further comprising at least one locking mechanism arranged elevationally below the first upper surface.
- 38. (Original) The flooring system according to claim [[38]]37, wherein a portion of the at least one locking mechanism is hidden by the second upper surface.
- 39. (Original) The flooring system according to claim [[38]]37, wherein a portion of the at least one locking mechanism is hidden by the first upper surface.
- 40. (Original) The flooring system according to claim [[23]]22, wherein adjacent ones of the at least two planks are joined together with glue.
- 41. (Original) The flooring system according to claim [[23]]22, wherein adjacent ones of the at least two planks are joined together without glue.
- 42. (Original) The flooring system according to claim [[23]]22, wherein at least one side of each of at least one of the at least two planks contacts more than one adjacent plank.

- 43. (Original) The flooring system according to claim [[23]]22, wherein the first groove of each of the at least two planks is substantially identical.
- 44. (Original) The flooring system according to claim [[23]]22, wherein the first surface is about 0.794 mm below the second upper surface.
- 45. (Original) The flooring system according to claim [[23]]22, wherein the second groove is substantially the same width as the first groove.
- 46. (Original) The flooring system according to claim [[23]]22, wherein the width of the first groove is between about 0.3 and about 0.9 mm.
- 47. (Original) The flooring system according to claim [[23]]22, wherein at least one sub-surface visually depicts wood.

1 The part of the same
